EFFECTIVE HOME VENTILATION

effiAIR 

EFFECTIVE HOME VENTILATION

An effective perimeter ventilation system that takes care of air circulation while providing security against intrusion. It will rid the kitchen of odors, and the bathroom of steam. It will ensure healthy sleep and silence in the bedroom, defend you from insects in the living room, and help remove exhaust fumes from the garage.

EFFECTIVE.

We improve the quality of life. The perimeter ventilation system continuously and effectively defends your home against insects, drafts, flooding, moisture, and wall mold.

FRESH.

We like comfort. Constant fresh air in the house, regardless of the time of day, the presence of guests or the weather.

PEACE OF MIND.

Security is important. The perimeter ventilation system takes care of air circulation, while effectively anti-burglary protection.

EFFICIENT IN THE KITCHEN.

Effectively takes care of air circulation when you cook.

Kitchens are the realm of culinary enthusiasts. They are also where extremely intense smells of frying, baking, or cooking mix. So, efficient ventilation of this room is extremely important. The ideal solution is an effiAIR system which ensures the circulation of fresh air, even when the windows are closed.

HEALTHY IN THE BATHROOM.

Effectively protects against moisture and mildew on the walls.

Every day the bathroom serves as our home spa, where we prepare for a new day and refresh ourselves after the hardships of everyday life. However, a shower or bath can cause high levels of moisture, creating ideal conditions for the growth of fungi and mold. Take care of your health and ensure proper ventilation with the effiAIR system.

QUIET IN THE BEDROOM.

Effectively takes care of silence when you are resting.

Everyone values a peaceful sleep. It is very important for health. It is best to sleep in well-ventilated rooms. However, opening a window is associated with the intensity of outside noise especially in cities or houses located along busy roads. The solution to the problem is the effiAIR system that allows you to ventilate the room without having to open the window. Limited!

SAFE IN CHILDREN'S ROOMS.

Effectively takes care of children's safety.

When thinking about the safety of our home, the first thing we have in mind is the protection of our children. Every parent wants to create a dreamlike yet safe play space for their child. EffieAIR is the ideal system, it provides excellent ventilation of children's rooms with the windows closed.

SAFETY IN THE LIVING ROOM.

Effectively defends against insects.

The period from spring until autumn is a time to fight the insects which try to storm our homes. We usually seek shelter from them in our comfortable living room, where we watch movies or spend time with the family in peace. To persevere without buzzing over the ear or scratching, bet on the effiAIR system, which will ventilate the room effectively while blocking the access of insects.

FRESH IN THE GARAGE.

Effectively helps to remove exhaust fumes from the garage.

A home garage greatly increases the safety of our car. However, it is also worth taking care of our health in this room. Exhaust fumes left in the garage without proper air circulation can persist for a long time and build up with every engine start. Ensure that your garage is properly ventilated with effieAIR and at the same time.

effiAIR - EFFICIENT VENTILATION

EffiAir is a new window functionality. Thanks to the separation of the sash from the frame, we create a ¼ inch gap around the perimeter of the window. This allows for natural ventilation and building a healthy indoor climate. What's more, in this position the fitting guarantees resistance to burglary as a locked window.

- used air flows out of the room through the upper part of the window, and fresh, cool air flows in through the bottom
- fittings with ventilation*
- anti-burglary protection
- possibility of ventilation when nobody is home
- better protection against wind and rain
- no drafts or slamming windows
- healthy indoor climate thanks to natural air exchange
- fittings available in these window systems: PIXEL and PAVA
- no insect screens necessary

* Ventilation function - a way of opening the window, in which the sash is offset from the frame by about ¼ inch around its perimeter.
